

*Your boat,
your colour*

A Bemis Company

“ Our boat, our personality ”

A world leading manufacturer of self-adhesive solutions

- **Established in 1959 (USA)** with headquarters in EU and USA with in-house, R&D and production
- **Dedicated range of unique self-adhesive films** used by worldwide professionals for decoration, personalisation and protection of buildings, trains, cars, ships...
- **Member of Bemis Inc.**, a US Fortune 500 Company

Innovative boat hull personalisation & protection*

Your boat is part of your life and a day at sea is priceless. Would you like to personalise it while still keeping its resale value?

MACtac TuningFilm are recognized across the world as a high quality solution for the personalisation and protection of valuable assets. Several colours and effects have been carefully chosen taking into account current colour trends.

We look forward to you to joining the group of happy boat owners sailing all over the globe (USA, UK, France, Germany, Belgium, Croatia) that chose TuningFilm.

Advantages?

A professional appearance and protective solution!
Manufactured in Europe (Belgium)!

- ✓ High-end UV protected, highly stable conformable Polymeric Vinyl Films.
- ✓ Resistant to most oils and grease, fuel, aliphatic solvents, weak acids, salts and alkalis.
- ✓ Deeply tinted, perfect finishing, reflection and high gloss.

Quick

Application in
2 days on average
(30ft/9m boat)

Cost effective

Usually less costly
than paint (finishes)

Resistant

UV, fading, abrasion

Gel-coat protection

Helps to keep
gel-coat like new

Long lasting

Up to 8 years (depending
on colour/effect)

Aesthetic

Like a brand
new boat!

Easy maintenance

Cleaning, spot repair

Environmentally friendly

VOC free

Removable

Selling? New colour?
Just remove the film!

Safe

No health
or safety hazards

“
As the Skipper, the owner of the boat asked me to get the hull repainted in blue. We instead chose TuningFilm as the appearance of the film is very good. A welcome surprise was that it took only 2 days to wrap the hull above the water-line. Now the hull looks like new and the maintenance is simple.”

Boat owner

Zlatan Zoricic
Skipper, former Croatian Olympic Sailing Team Coach

Boat reference

IMX X45, « Barba Brank »

TuningFilm reference

Scandinavian Blue

“
I wanted to have a colourful hull and find an economical but still professional solution. I chose TuningFilm as it offers very good value for money. I also liked the fact that the film protects the gel coat which would help if I come to resell.”

Boat owner

Jean-Pierre Lambrechts

Boat reference

Beneteau 27.7, « CapOkaz »

Scandinavian Blue (1 side) + Brushed Aluminium (the other side)

What are the steps?

Your boat will be ready before you know it! Once you have chosen from all the colours and effects available, rely on our **MACtac application partners** (all around the world) for a professional application.

1

Hull Surface Preparation

- Remove as much hardware and rigging as possible to make the job easy
- Carry out spot repairs to have a smooth hull surface
- Clean thoroughly using a solvent based cleaner

+ TuningFilm requires minimal preparation work (no risk of overspray)

2

TuningFilm Application

- Apply the film from bow to stern (emerged area above the waterline)
- Heat (heat gun) the film wherever necessary to conform to the curved areas

+ TuningFilm offers the right solution thanks to unique features that guarantee a perfect adhesion, opacity, high gloss and colour retention as well as durability

3

TuningFilm Trimming

- Carefully cut the film to shape around fittings
- Check the whole application and reinstate removed hardware
- Seal the edges

+ TuningFilm can easily be conformed and cut

4

Finishing

- Striping and boat identification (we recommend MACal 9800 Pro from MACTac which has already been used for years)
- Only wait 24 hours before putting the boat back in the water

+ 2 days may be enough for wrapping a First 27.7 (30ft/9m)!

Trimming details

Focus on MACTac TuningFilm Micro-structured™ Adhesive Technology

The fruit of 53 years of MACTac know-how, a unique adhesive pattern has been developed by in-house R&D, allowing easy application, conformability and adhesion to gel-coats

Removability

MACTac's unique adhesive formula ensures easy removal.

Since 1959, MACTac films have gained worldwide market recognition thanks to our in-house R&D team and the development of high performing adhesives.

Maintenance

- **Increase TuningFilm durability on high friction areas** by applying patches of a protective transparent film (MACTac Crystal Protect);
- **Clean with water and neutral PH soap** after each sailing;
- **Apply wax** whenever necessary.

Conformability

Conformability is key for boat wrapping. Thanks to TuningFilm's unique structure, the film can be conformed into inward curved areas while still maintaining optimum adhesion.
