DIGITAL PRINT FINISHING SOLUTIONS
PRINT FINISHING SOLUTIONS FROM FOTOBA

The Digitrim features the ability to sense **cut marks** placed between multiple digital images, printed or exposed simultaneously on single pages or rolls of digital media.
Most printing devices have the capability to create Cut Marks automatically. In case this option is not available, each Digitrim is supplied with TrimManager, the Rip software that nests, clones and paginates automatically different images on the same web. You can download it from our web site **http://www.fotoba.com.**

FOTOBA CUT MARK

Regardless of any slight misalignment, when paper is introduced into the Digitrim, the cutter will automatically re-align itself to the image side!
